

# TECHNICIAN TIPS

- Clean your equipment and shoes prior to entering an account. Do not leave stains or marks on floors and carpets. Dirty hand pump sprayers (interior and exterior) is one of the major culprits for indoor stains caused by pest technicians.
- Perform a "Walk Through" prior to performing any service. Check for pet food dishes, water dishes, pets, toys, and other possible problems or obstructions.
- After treating exterior areas be sure to CLOSE the yard GATES!
- Park your vehicle properly. Do not block driveways or sidewalks.
- Do not obstruct sidewalks with your power spray hose. Either park in the driveway to power spray, or post cones on either side of the power spray hose where it crosses the sidewalk. Do not pull on the hose unless you can see the hose and the sidewalk to make sure no one is walking over or near the hose.
